Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 6-11, 15-18, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grayson et al in view of Schlosser et al. Grayson et al discloses the claimed invention, including an ice making system having a rotating auger for marine use. However, Grayson et al does not disclose the ice making system as having a condenser and compressor subassembly located remote from the ice making subassembly which includes the auger. Schlosser et al teaches an ice making system including a condenser and compressor subassembly 6 which is located remote from the ice making subassembly 2, 8, 9. It would be obvious to modify Grayson et al so that the ice making subassembly which includes the auger is located remote from the condenser and compressor subassembly, in view of Schlosser et al, for the purpose of ease of repair and maintenance of the ice maker.
3. Claims 3-5, 12-14, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
